

REMALEN

The special solution for any material flow problem

REMALEN is a combination of highest-quality polyethylene and rubber. Its slippery surface helps eliminate build-up and guarantee a continuous flow of material, thereby increasing throughput and the productivity of your equipment.

Areas of application

REMALEN linings are designed for a specially wide range of applications in a wide area of industry, thanks to their excellent surface quality. Especially when conveying and handling very fine-particle and dust-like material, linings with **REMALEN** reduce the build-up of fine material to a minimum, thereby increasing the productivity of your equipment. The excellent quality of **REMALEN** is also an impressive factor for the storage and transport of bulk materials and piece goods.

Typical areas of application

- Gutters
- Slides
- Material transfer stations
- Pipelines
- Storage containers
- Funnels
- Cyclones
- Cones, etc.

Your benefits

- Optimum protection from build-up, bridging and friction wear
 - Noise reduction thanks to rubber cushion
 - Reduction of maintenance costs
 - Reduction of equipment wear
 - Impressive return on investment
 - Easy and fast installation
- => Increases the efficiency of your equipment**

One Name – One Source – One System

REMALEN

The special solution for any material flow problem

Technical properties

Product description	Combination of polyethylene and rubber <ul style="list-style-type: none">▶ Super-ultrahigh molecular polyethylene surface▶ Elastic rubber base with CN bonding layer▶ Permanent bond between polyethylene and rubber thanks to heat vulcanization
	CN bonding layer <ul style="list-style-type: none">▶ REMALEN comes equipped with a CN bonding layer which affords the product an extremely good adhesive quality in combination with the REMA TIP TOP adhesive systems.
Surface color	gray, PE, 1 mm
Base color	rubber (black) with CN bonding layer, 2 mm
Item no.	550 9881
Dimensions (mm)	3 x 1,500 in lengths ranging from 5–30 m
